# A LETTER FROM OUR TEAM

## Friends, Family & Colleagues:

Thank you for taking the time to read our 2020-2021 Annual Report. It always brings us such joy to share the amazing work you help us accomplish year in and year out. Going into year 3, with COVID cases on the rise, international nonprofits grounded stateside, an uncertain economy, etc., we knew that we were going to have our work cutout for us. We are incredibly proud that, despite the odds, we continued to work tirelessly towards our goal of creating a more collaborative international development ecosystem. This past year we watched our team grow, we expanded programming, added new projects to our arsenal, and signed on 6 new partners!

With a programming model proven to build local capacity and drive lasting change, this past year we expanded our operations to two new sites: Santiago and Cevicos – Sanchez Ramirez, Dominican Republic. Our team trained 9 talented individuals, all of whom have been extremely active in identifying and meeting needs in their communities' needs. Equally as exciting, with the addition of new team members, we had the opportunity to add a new program: Water, Sanitation and Hygiene (WASH). The creation of said WASH program led to our first community-level water project, which now provides daily water access to 100 individuals and a local school.

In 2020-21, our tech team also continued to grow and make great strides towards putting "Puente – Collect" on the international development map. Our team worked night and day to rebuild our application with more capabilities and the ability to scale to thousands of users. Their hard work is already paying off, as we have 6 new partner NGOs using our technology across 7 different countries. We now have over 400 users—engineers, medical professionals, teachers, development practitioners—that use our mobile application to gather individual and community-level insights to better understand and meet needs.

Our goal of creating a more collaborative development ecosystem—led by host-country nationals—is truly taking shape. We've had the pleasure of seeing families' lives transform in front of our eyes, and it all starts with giving them the tools to do so.

From the bottom of our hearts, we thank you for helping make it all possible!

Much Love,  
The Puente Team

# Community Development Practitioners

Our introduction to sustainable development program is a course designed to teach individuals how to work with community stakeholders, identify our model for several years now and we recently had the opportunity to expand.

Our network has used our technology to gather the needs of 4k+ individuals and infrastructure projects to meet the immediate needs.

## IMPACT NUMBERS

**12 Practitioners Trained (2020-21)**

**39 Practitioners Trained (Total)**

**18 Communities Impacted (2020-21)**

**35 Communities Impacted (Total)**

**834 Residents Impacted (2020-21)**

**2,719 Residents Impacted (Total)**

**\$18,593 Spent on Community Development Programming**

d to give local leaders the tools to drive their own community projects. This  
ify needs, collect / analyze data, and design projects. We have been shaping  
nd to several new cities in the Dominican Republic.

als around the Dominican Republic. Data is then used to shape community

## **NAILENY BRITO**

### **Training Manager**

**Naileny** joined our team this past year as one of the first volunteers in Santiago. Within 4 months, Naileny made introductions in 12 communities and collected over 1.5k household survey forms. Her ability to independently carry out the entire process of community development earned her a Community Coordinator title at Puente within 6 months of starting. But it doesn't stop there!

After successfully co-leading site expansions, Naileny has taken over as the main point of contact for 10+ practitioners throughout the DR. To no ones surprise, Naileny has taken on her new role incredibly well! Congrats, Naileny!!

# Health P Building Loc

Our health promoter program was designed by locals to help volunteers better serve the community. Practitioners are trained on common chronic diseases, preventative practices, and basic first aid (on missions). Our network sees over 175 at-risk patients every month in order to combat the effects of poverty.

## Numbers at a Glance

**2,250 Home Visits (2020-21)**

**4,450 Home Visits (Total)**

**\$10,871 Spent on Programming**

**9 Health Promoters Trained (Total)**

# romoters cal Capacity

er meet the health needs of their neighbors and fellow community residents. maternal health, action plan creation and follow-up procedures (post medical check important vitals such as blood pressure and blood sugar levels.

## FEATURED HEALTH PROMOTER: **ELBA MARTINEZ**

Our star Health Promoter and 911 First Responder, Elba Martinez has continued to build out our Health Promoters Course. In her free time, Elba created a new health promoter manual that can be used to scale our program into new sites. This year, Elba recently had the chance to expand her programming to Cevicos. Working with Holy Family Cevicos, we successfully trained 5 individuals in Sanchez Ramirez to collect the health needs of their communities pre-medical missions. We will use this health data to pre-identify medical mission sites, at-risk patients, as well as refer cases to local doctors. Elba plans to take our program to new heights this upcoming year!

*"I love giving back to my community and its residents. Puente gives us the opportunity to identify and tackle our own needs."*

**-ELBA MARTINEZ**

# Water Access, Sanitation and Hygiene (WASH)

# PUENTE WASH

## Investigate, Design, Implement

Puente's WASH program gives the knowledge and tools to Dominican leaders to solve water and sanitation problems in their own communities. Training includes how to collect community data on water and sanitation, how to analyze water for biological contaminants, and how to develop and evaluate WASH projects.

## This year we trained 8 WASH practitioners across 3 Provinces.

Our greatest WASH impact comes in our signature projects: bathrooms, cement floors, ceramic filters, and water access. This breadth of projects allows us to target WASH needs where a community needs them most. Ceramic filters provide quality drinking water, while our water access projects increase the quantity of water. Bathrooms and cement floors provide infrastructure to combat disease, safe waste management, and improve overall hygiene. We would like to thank all supporters, especially Friends of the Dominican Republic, for your help in our WASH initiatives.

**250** Water Tests Conducted

**835** Lives Impacted in 2020-21

**\$19,779** Spent on WASH Programming

# PROGRAMMING EXPANSIONS

## Santiago, Dominican Republic

**12** Communities Surveyed

**1,425** Homes Surveyed

**67** Residents Impacted

**3** Development Practitioners Trained

**\$6,750** Spent on projects in Santiago

After training 3 individuals in the Santiago region, our team got to work surveying communities with the goal of driving lasting change. We partnered with international nonprofit TECHO, to work with Nuevo Amanecer -- a community that had previously identified health and sanitation as their biggest need. With the help of your donations we were able to build 9 Puente Potties for residents in Nuevo Amanecer and we have plans to construct 25 cement floors in this upcoming year. We are excited to have trained volunteers on the ground in Santiago to expand our impact in that region of the Dominican Republic.

*"Having the opportunity to expand to my hometown of Santiago means everything to me. I've had the opportunity to see what our communities can do given the proper tools and motivation. I look forward to giving these tools to my fellow Santiagueros and watching them grow!"*

- Crismary Gutierrez  
Co-Founder & Country Director

# PROGRAMMING EXPANSIONS

Cevicos - Sanchez Ramirez, DR

Working with our new partners at Holy Family Cevicos, we had the opportunity to expand our programming to a remote pueblo in the Sanchez Ramirez region. The village consists of roughly 20k residents, the vast majority of which live in rural communities that lack community infrastructure.

## KEY NUMBERS

**11** Communities Surveyed

**685** Household have voiced their needs

**100%** Of Puente practitioners are satisfied with their role and feel that their work will change lives

Over the last 5 months, our team has trained 6 development practitioners on sustainable development practices, water, access and hygiene, and health promoter workshops. Practitioners will now evaluate individual and community-level needs in order to find culturally-appropriate solutions.

# PUENTE POTTIES

## Our sanitation solution

Access to a sanitary toilet is not only a basic human right, but it also prevents critical illnesses, such as chronic diarrhea, enabling individuals to lead healthy lives. Our bathrooms project aims to improve this health infrastructure problem in the most vulnerable communities by providing residents with high-quality bathrooms. We use the Puente application to identify the number of households who lack access to a bathroom or latrine, as well as related health conditions that could be due to a lack of proper sanitation facilities. We then build high-quality bathrooms for these same families, directly boosting each individual's quality of life.

We look forward to continuing our sanitation projects this upcoming year with a few new twists. Our engineers and partners at Friends of the Dominican Republic have decided to improve our bathroom model to also incorporate hand-washing stations. Additionally, if the foundation of the house permits, bathrooms will now have a concrete roof in order to double as an emergency shelter for hurricanes and extreme weather.

## IMPACT NUMBERS

**27** Puente Potties constructed in 2020-21

**110** Puente Potties constructed in Total

**429** Residents Impacted

**100%** of bathrooms are in good-great condition

**98%** of recipients feel safer with their new bathroom facilities

**92%** of recipients say their quality of life has improved as a result

**85%** of recipients say their health has improved as a result of a new bathroom

## CERAMIC WATER FILTERS

### Making clean water accessible

Without a source of clean water, individuals and children in particular are susceptible to diseases, parasitic infection, and diarrhea as a result of drinking contaminated water. Using Puente software, we are able to identify the households throughout the D.R. that rely on contaminated tap water as their main access to drinking water; we also track medical conditions that might be related to the consumption of contaminated water. Our water filters project seeks to supply a clean water source to these families to improve health outcomes: a ceramic water filtration system removes contaminated materials from tap water, resulting in clean and safe drinking water. In addition to a water filter, families also receive sanitation and health education in order to provide them with the building blocks needed to lead a healthy life in all aspects.

# LET THE NUMBERS DO THE TALKIN'

## The impact of water filters

Filters are purchased by our partners at Constanza Medical Mission from local NGO, Wine to Water. Puente Practitioners then distribute filters at an affordable, discounted rate for all residents who are interested. Our WASH team then conducts water quality tests on each filter every 3-6 months to ensure they are being properly used and cleaned.

**119** Distributed in 2020-21

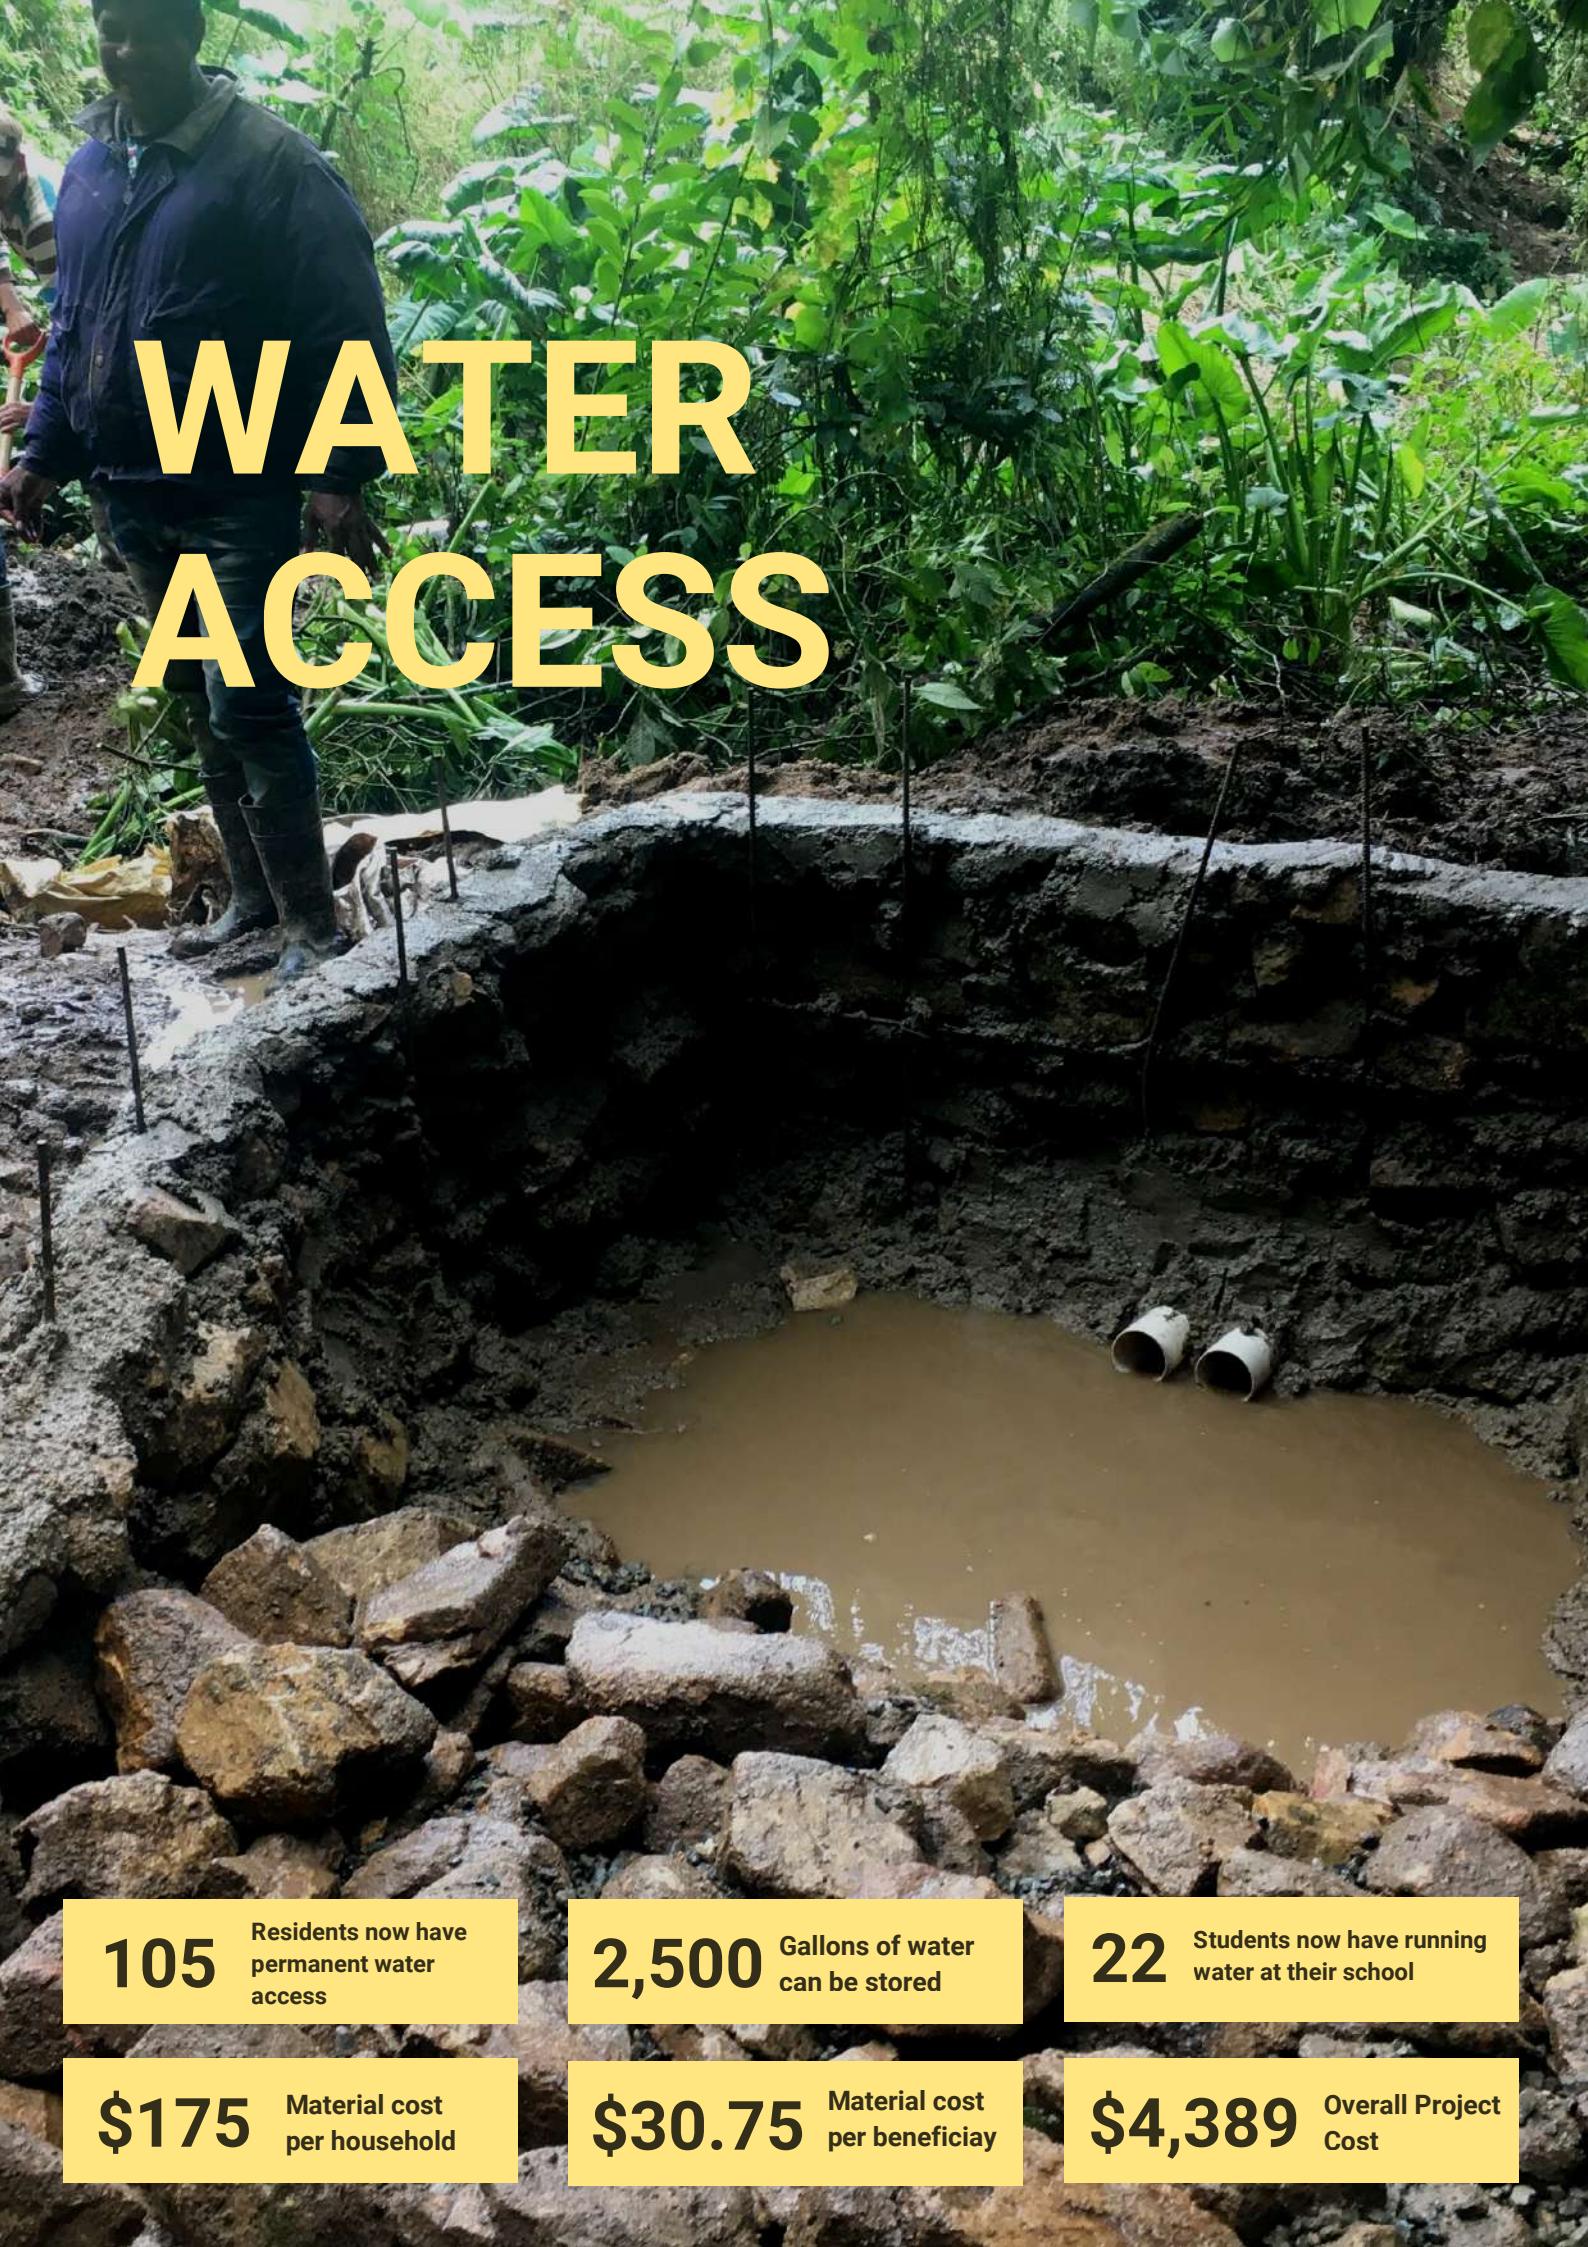

**406** Distributed in total

**464** Residents impacted in '20-21

**1.5k** Residents Impacted in total

# WATER ACCESS

**105**

Residents now have permanent water access

**2,500**

Gallons of water can be stored

**22**

Students now have running water at their school

**\$175**

Material cost per household

**\$30.75**

Material cost per beneficiary

**\$4,389**

Overall Project Cost

# IMPROVING WATER ACCESS

## Spring Box in Cruz de Cuaba

Puente's first community-level water access project was completed May 2020 in **Cruz de Cuaba, Tireo**. Cruz de Cuaba is a remote agricultural community outside of Constanza. Utilizing the data we collected in the area, several priorities stood out including roads, education, sanitation, and electricity access. However, the largest problem identified by the residents was access to water. Before the project, 61% of residents had to collect water outside of their home and 20% of households spent over 30 minutes per day gathering water. In addition, the elementary school did not have enough water to support it's 22 students.

The community was using water from a nearby spring, but the tubing was broken and undersized. Our project included the construction of a spring box to filter and store water at the source, and replaced 1,800 feet of outdated tubing. Additionally, we installed a pump was to deliver water to houses in a sector that could not be reached via gravity from the spring. Overall, we increased the quantity and quality of water for 105 residents and the elementary school, and the community contributed 30% of the cost!

# PUENTE- COLLECT TECHNOLOGY

# PUENTE - COLLECT

"CHANGING HOW THE EMERGING WORLD VIEWS DATA COLLECTION"

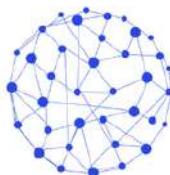

Puente's tech department had an amazing year, as we continued to grow our team and our user-base. We saw a 50% increase in users and over 1,000% increase in forms collected. Our application has new features such as offline capabilities, asset mapping, and customizable workflows to ensure users have an enjoyable experience collecting data.

This year, as we continue to build out features within the application, we will also be building out our automated analytics to better meet the needs of our communities and users.

## PARTNER HIGHLIGHT: RYAN'S WELL

Ryan's Well has provided over 1.1 million people with access to running water. They have also provided training to ensure their systems are working properly. Additionally, their local partners are always looking for new needs of new communities to implement future projects such as latrines and more wells.

Ryan's Well has been an amazing partner for us as they push us to build our own capacity and assets. Their forms can be found within our "Form Marketplace."
